

YOUR PCB PARTNER™

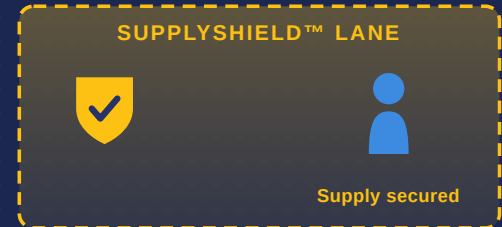

DON'T GET STUCK IN LINE.

THE WAITING LINE

Still waiting · repricing every month

THE SUPPLYSHIELD™ LANE

YOUR SUPPLY CHAIN. PROTECTED.

Material prices keep climbing. Quote validity keeps shrinking. Supply is less predictable every week. With **MCL SupplyShield™**, you secure your supply by utilizing MCL warehouse storage for critical inventory — reducing lead time and pricing uncertainty while minimizing production risk. Lock in your price when you order, protect material availability, and pay on normal terms as your boards ship.

WHAT YOU LOCK IN

- ✓ Lock in your price when you order
- ✓ Secure material before shortages occur
- ✓ Protect material availability
- ✓ Improve forecasting accuracy
- ✓ Normal payment terms based on shipment dates
- ✓ Buy with confidence

THE MATH, MADE SIMPLE

CUSTOMER EXAMPLE

\$250,000 annual PCB spend

BUYING MONTHLY

Re-priced higher every order. Constant interruption.

WITH SUPPLYSHIELD™

Price locked across the holding period.

POTENTIAL COST AVOIDANCE

25–50%

Estimated savings over the holding period. Actual results vary by volume, material, and market conditions.

When the market is uncertain, certainty becomes a competitive advantage.

Talk with your MCL representative about whether SupplyShield™ is right for your next production run.

SUPPLYSHIELD™ • PROGRAM TERMS

HOW THE LOCK WORKS.

You order boards up front at today's price. We build them, hold the inventory, and release shipments on your scheduled dates — and you only pay as each shipment ships. Here's exactly how it works.

FOUR STEPS TO A LOCKED PROGRAM

1

Place your order up front

Commit your inventory needs with a firm release schedule, all at today's price.

2

We build it all now

Your boards are released to production and produced up front — price locked.

3

We hold your inventory

Boards are held and allocated to you across the full 6-month window.

4

Ship & pay on schedule

We release shipments on your dates — you pay only as each one ships.

PROGRAM TERMS & CONDITIONS

These terms make the program possible. Your sales representative will walk through them with you before your order is placed.

Inventory held up to six months

The six-month term begins upon completion of manufacturing.

Firm delivery schedule required

Provide a delivery schedule for all product within the 6-month holding period at the time of order.

Orders are non-cancellable

All boards are produced at the time of order and inventory is held for you. POs cannot be cancelled.

Pricing & availability until order

Material availability and quoted price remain subject to change until an order is placed — even during the EQ process. Once locked, materials and pricing are guaranteed.

Date code acceptance

Date codes accepted up to one year.

Pay only as boards ship

Payment is due on each scheduled shipment — not all up front.

Tell your sales representative at order

Let your sales representative know at time of order that you're enrolling in SupplyShield™.

Minimum order value & shipment

A minimum order value of \$1,000 per release is required. Customer is also responsible for freight costs from MCL warehouse (Harrisburg, PA) to end shipping destination.

Friendly reminder: pre-bake your boards.

Pre-baking your boards to IPC standards is a small step that protects against moisture and keeps quality high after their time in inventory.

Ready to lock in your price?
